

PROJECT PLANNING MADE EASY WITH ITS-NETPROGRESS

Our state-of-the-art tool for FTTH project rollout and the planning & building of fiber optic networks.

WEB-BASED

ITS-NetProgress is our new web-based project management and planning tool. Wherever you are, you'll have detailed and up-to-date information about your project.

FLEXIBLE USERS & USER ROLES

Within the program, you can create different users and user roles to match your project. This gives you the ability to grant access to only those parts of the project that are relevant to your project user.

PROJECT OVERVIEW

ITS-NetProgress gives you the ability to have an overview of your project, from hawk eye-view to micro view. The dashboard gives a quick overview of the progress status and costs + FTU of different phases of the project. It's even possible to show the progress % per area in Google Earth!

DETAILED PLANNING WITH GANTT CHART

This new FTTH planning tool has integrated detailed planning functionality per project, area, task and sub-task with dynamic Gantt-chart.

OPEN INTERFACE WITH YOUR DESIGN

ITS-NetProgress can interface with any design software. Direct design reports of material and labor quantities & cost per area with one mouse-click. You can start planning your project right away!
